Professional Summary

Full-Stack Software Engineer with **3 years of experience** building and shipping production web applications end-to-end using **Next.js, React.js, TypeScript, Node.js**, and **tRPC / oRPC**. Designed and independently launched **CrayonSparks**, a live **AI SaaS** with a **multi-provider AI pipeline** (OpenAI, Gemini), **subscription billing**, and **cloud storage**. Contributed to **LeetCV** (**150,000+ users**) and built **backend services** for **LeetCampus**, a placement platform serving **2,500+ concurrent students per placement drive**. Strong in **application architecture, API design, performance optimization**, and **AI integration**.

Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: Next.js, React.js, Redux, Recoil, Jotai, Zustand, Tailwind CSS, SEO Optimization

Backend & APIs: Node.js, Express.js, tRPC, oRPC, REST APIs, Firebase Admin, Authentication & RBAC, Webhooks, Sanity CMS, Server Actions, Vercel Cron Jobs

Databases: MongoDB, Firebase / Firestore, MySQL, PostgreSQL, Supabase

Cloud / Deployment & Storage: Vercel, Railway, Netlify, AWS Amplify, AWS EC2, Cloudflare R2, AWS S3, Cloudinary

AI & Integrations: OpenAI, Google Gemini, Vercel AI SDK, AI image & content generation, LemonSqueezy & Razorpay (payments & billing), Email & Webhook integrations, N8N

Testing & Tooling: Jest, Playwright, Postman, Git/GitHub, CI/CD, Sentry

Experience

Software Engineer, Darthwares – Coimbatore.

July 2023 – Present

- Built and shipped **three production web applications end-to-end** using **Next.js, TypeScript, Tailwind CSS, Firebase**, and **tRPC** — owning features from design through deployment.
- Improved page load speeds by 40%** and cut **re-render issues by 40%** by refactoring legacy code and optimizing rendering across multiple production apps.
- Automated **result-report emails** to admins using **Vercel Cron Jobs**, dispatching performance summaries automatically once a mock placement drive or test is completed.
- Designed reusable **UI components** and added **Jest unit tests** for core workflows, improving reliability and delivery speed.
- Worked directly with **clients and cross-functional stakeholders** to translate requirements into **technical specifications**, delivering client-facing applications to spec and on schedule.
- Collaborated in **Agile teams**, performed **code reviews**, and ensured smooth **deployments** across cross-functional releases.

Projects

1) CrayonSparks – (AI Book SaaS — Personal Product, Founder & Sole Engineer)

Tech Stack : Next.js 16 | React 19 | TypeScript | oRPC | Firebase / Firestore | OpenAI & Gemini | LemonSqueezy | Cloudflare R2

- Designed, built, and deployed a **full-stack AI SaaS** end-to-end as **sole engineer** — turning prompts into print-ready story, coloring, and activity books.
- Engineered a **multi-provider AI pipeline** (**OpenAI + Google Gemini** via Vercel AI SDK) for image and text generation, with async orchestration and error handling.
- Built a **type-safe backend** with **oRPC** and **Firebase Admin / Firestore** (auth, security rules), plus **Cloudflare R2** storage and **PDF generation** for print-ready KDP exports (**titles published live on Amazon KDP**).
- Integrated **subscription billing** and a custom **metered credits system** via **LemonSqueezy webhooks**; deployed on **Vercel** with **Sentry** monitoring.

(The following projects were developed as part of my role at Darthwares – Coimbatore.)

2) LeetCampus – (AI-powered College Academic & Placement Platform)

Tech Stack : Next JS | TypeScript | Firebase Admin | tRPC | Tailwind CSS | Jotai

- Engineered a scalable **role-based access system** for admins, professors, and **2,500+ students**, ensuring secure and efficient workflows.
- Built **AI-driven modules** including **Leet Tutor** (AI slide generator) and **Mock Placement Drive** with automated AI-generated feedback.
- Built **backend services** and **placement-drive workflows** — **QR-code attendance** and **drive updates via email/SMS notifications** — serving **2,500+ concurrent students per placement drive**, cutting manual work by **80%**.

3) LeetCV – (AI-powered Resume Builder)

Tech Stack : Next JS | TypeScript | Firebase Admin | tRPC | Tailwind CSS | Recoil

- Contributed to **LeetCV**, an AI-powered resume builder **trusted by 150,000+ users worldwide**.
- Built **Leet Link**, a Linktree-style module enabling users to share resumes, portfolios, and social profiles.
- Refactored **legacy code** and optimized workflows, reducing component complexity and cutting **re-render issues by 40%**.
- Implemented **telemetry and analytics dashboards**, improving visibility into user activity and enabling **data-driven decisions**.

4) Ennuviz - (Enterprise Digital Transformation Website)

Tech Stack : Next JS | TypeScript | Sanity | Tailwind CSS

- Built a custom **event registration system** for seamless data capture and user management.
- Integrated **spreadsheet automation** to export registration data, reducing manual reporting work by **90%**.
- Optimized **site structure, metadata, and SEO**, enhancing organic visibility and performance metrics.

Certifications

- **SQL (Intermediate)** – HackerRank
- **AWS Free Course** - Scaler Topics
- **React (Basic)** – HackerRank
- **Problem Solving (Basic)** - HackerRank
- **Frontend Development Libraries** – FreeCodeCamp
- **JavaScript Algorithms & Data Structures** – FreeCodeCamp

Education

MERN Stack Web Development , Skill Safari – Coimbatore.

Sept 2022 – May 2023

BE Metallurgical Engineering , PSG College Of Technology.

Aug 2018 – Jun 2022

• CGPA : 7.66/10.
