Professional Summary

Full-Stack Software Engineer with **2+ years of experience** building and shipping production web applications end-to-end using **Next.js, React.js, TypeScript, Node.js**, and **tRPC / oRPC**. Designed and independently launched **CrayonSparks**, a live AI SaaS product with a **multi-provider AI pipeline** (OpenAI, Gemini), **subscription billing**, and **cloud storage** — owning architecture, backend, and deployment as sole engineer. At work, built **type-safe APIs**, **role-based access control**, and **AI-powered features** serving **2,500+ users**. Strong in **application architecture**, **API design**, and **performance optimization**, with a passion for **clean architecture** and **AI integration**.

Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL (basics)

Frontend: Next.js, React.js, Redux, Recoil, Jotai, Tailwind CSS, Bootstrap, Responsive UI, State Management, SEO Optimization

Backend & APIs: Node.js, Express.js, tRPC, oRPC, REST APIs, Firebase Admin, Authentication & RBAC, Webhooks, Sanity CMS, Server Actions

Databases: MongoDB, Firebase / Firestore

AI & Integrations: OpenAI, Google Gemini, Vercel AI SDK, AI image & content generation, LemonSqueezy & Razorpay (payments & billing), Email & Webhook integrations

Cloud & Storage: Vercel, Netlify, Cloudflare R2, AWS S3, Cloudinary

Testing & Tooling: Jest, Playwright, Postman, Git, GitHub, CI/CD, Sentry

Experience

Software Engineer, Dardhwares – Coimbatore.

July 2023 – Present

- Developed and optimized **responsive, scalable web applications** using **Next.js, TypeScript, Tailwind CSS, Firebase**, and **tRPC**, improving page load speeds by **40%**.
- Implemented **role-based access control**, **dynamic onboarding forms**, and **real-time system features**, boosting workflow efficiency for **2,500+ users**.
- Built **AI-powered modules** including **resume generation**, **interactive tutoring**, and **mock placement drives**, increasing automation and engagement by **35%**.
- Collaborated in **Agile teams**, performed **code reviews**, and refactored **legacy code**, cutting technical debt and complexity by **30%** while ensuring smooth **deployments**.
- Designed reusable **UI components** and added **Jest unit tests** for core workflows, accelerating development by **25%** and improving reliability.

Projects

1) CrayonSparks – (AI Book SaaS — Personal Product, Founder & Sole Engineer)

Tech Stack : Next.js 16 | React 19 | TypeScript | oRPC | Firebase / Firestore | OpenAI & Gemini | LemonSqueezy | Cloudflare R2

- Designed, built, and deployed a **full-stack AI SaaS** end-to-end as **sole engineer** — turning prompts into print-ready story, coloring, and activity books.
- Engineered a **multi-provider AI pipeline** (**OpenAI + Google Gemini** via Vercel AI SDK) for image and text generation, with async orchestration and error handling.
- Built a **type-safe backend** with **oRPC** and **Firebase Admin / Firestore** (auth, security rules), plus **Cloudflare R2** storage and **PDF generation** for print-ready KDP exports.

- Integrated **subscription billing** and a custom **metered credits system** via **LemonSqueezy webhooks**; deployed on **Vercel** with **Sentry** monitoring.

(The following projects were developed as part of my role at Darthwares – Coimbatore.)

2) LeetCampus – (AI-powered College Academic & Placement Platform)

Tech Stack : Next JS | TypeScript | Firebase Admin | tRPC | Tailwind CSS | Jotai

- Engineered a scalable **role-based access system** for admins, professors, and **2,500+ students**, ensuring secure and efficient workflows.
- Built **AI-driven modules** including **Leet Tutor** (AI slide generator) and **Mock Placement Drive**, increasing student engagement by **35%**.
- **Automated placement workflows** via **email triggers** and **SMS notifications**, reducing manual communication time by **80%**.

3) LeetCV – (AI-powered Resume Builder)

Tech Stack : Next JS | TypeScript | Firebase Admin | tRPC | Tailwind CSS | Recoil

- Built **Leet Link**, enabling users to share resumes and project portfolios, resulting in **25% higher** profile engagement.
- Refactored **legacy code** and optimized workflows, reducing component complexity and cutting **re-render issues by 40%**.
- Implemented **telemetry and analytics dashboards**, improving visibility into user activity and enabling **data-driven decisions**.

4) Ennuviz - (Enterprise Digital Transformation Website)

Tech Stack : Next JS | TypeScript | Sanity | Tailwind CSS

- Built a custom **event registration system**, increasing user onboarding efficiency by **35%**.
- Integrated **spreadsheet automation** to export registration data, reducing manual reporting work by **90%**.
- Optimized **site structure, metadata, and SEO**, enhancing organic visibility and performance metrics.

Certifications

- **AWS Free Course** (Scaler Topics) – Certificate of Excellence, May 2026
- **React – Basic** (HackerRank) – Credential ID: 4706b3d3b597
- **Problem Solving – Basic** (HackerRank) – Credential ID: cee5197d9c73
- **MERN Stack Web Development** – Skill Safari
- **Frontend Development Libraries** – FreeCodeCamp
- **JavaScript Algorithms & Data Structures** – FreeCodeCamp

Education

MERN Stack Web Development , Skill Safari – Coimbatore.	Sept 2022 – May 2023
BE Metallurgical Engineering , PSG College Of Technology.	Aug 2018 – Jun 2022
• CGPA : 7.66/10.
